

KeyGrabber

QUICK START

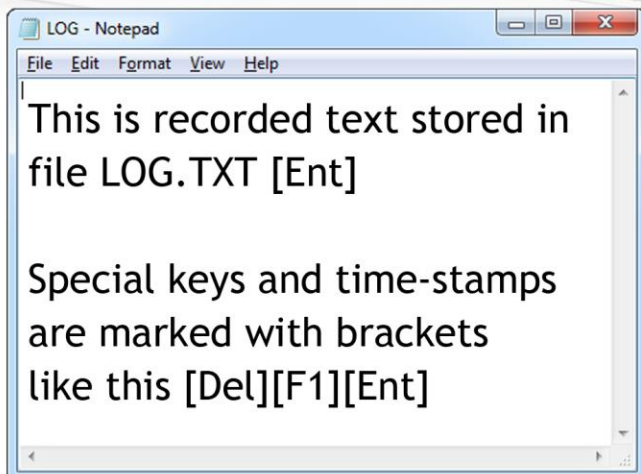

Important tips:

- Works only with external USB keyboards, does not work with laptop keyboards
- To access data, press and hold password keys KBS together on external keyboard
- Be sure to obey keystroke recording laws and regulations in your country!

Connect the keylogger
in-line between the
keyboard and
computer

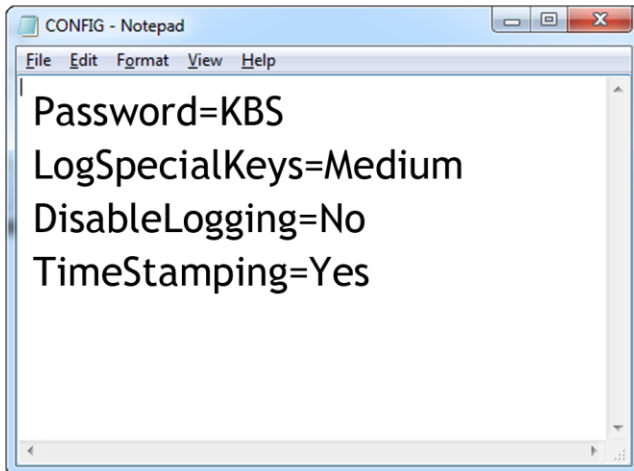

Press and hold the keys
K B S
together for flash drive mode

Recorded data is
stored in file
LOG.TXT

To configure the device edit file **CONFIG.TXT** in the flash drive main folder

Memorize your password in case you change it. Otherwise access to the device will be impossible!

Password = ABC (must be 3 keys, please memorize!)

LogSpecialKeys = None / Medium / Full

DisableLogging = Yes / No

DisableLayout = Yes / No

TimeStamping = Yes / No (TimeKeeper version only)

MacMode = Yes / No (MCP version only)

To enable a national keyboard layout place a selected **LAYOUT.USB** file in the flash drive main folder

To set the internal clock create **TIME.TXT** in the flash drive main folder

Format = 24 / AM / PM (24h or 12h format)
Year = 2018
Month = 4 (1=January ... 12=December)
Day = 25 (1...31)
Hour = 13 (0...23 for 24h, 1...12 for AM/PM)
Minute = 54 (0...59)
Second = 38 (0...59)

- Available only in the TimeKeeper version
- Set **TimeStamping=Yes** in **CONFIG.TXT**
- The clock will be set upon next power-up

MAC-compatible mode is enabled
by default in the MCP version.
To disable put this in CONFIG.TXT
MacMode = No

More information is available
in the User Guide on the flash drive
